

To who it may concern.

Dear Sir/Madam,

I am writing in reference to West Midlands Electrical Installations Ltd. Sandwell Council have been using the services of this company for the last 10 years, for repair works, and various Electrical Engineering Services including installation projects, relating to electrical power/lighting systems, fire alarm systems, and emergency lighting. During this period we have found them to be value for money, very efficient, and produce high standard of quality work. We are happy to recommend their services to other companies/parties in the confidence that the same standard of quality service would apply.

Regards

Norman Utting
