

Morning gents,

Just wanted to acknowledge the good work and attitude your operatives demonstrated earlier on gasifier ally stream 2 cat ladder next to the bunker wall, the access ladder was isolated with red and white demarcation tape by Taziker scaffolders because they are working at high level and needed suitable and safe work area, rather than Jack and Sam (Tyco) ignoring the tape and quickly getting the job done as they had worked in the area yesterday they came up to see us and gave us the chance to organise with all involved in the area what could be done to keep everyone working in a productive and ultimately safe manner.

Please pass on my thanks to all the guys involved and I hope to see some of them on Friday in the safety committee.

Regards Steve.

Steven Steel
